

Who is SEnerCon?

Ltd. founded in 2004 in Berlin and Munich

Engineers and software developers work passionate on energy monitoring for residential buildings

Focus on Efficiency of Heating Systems

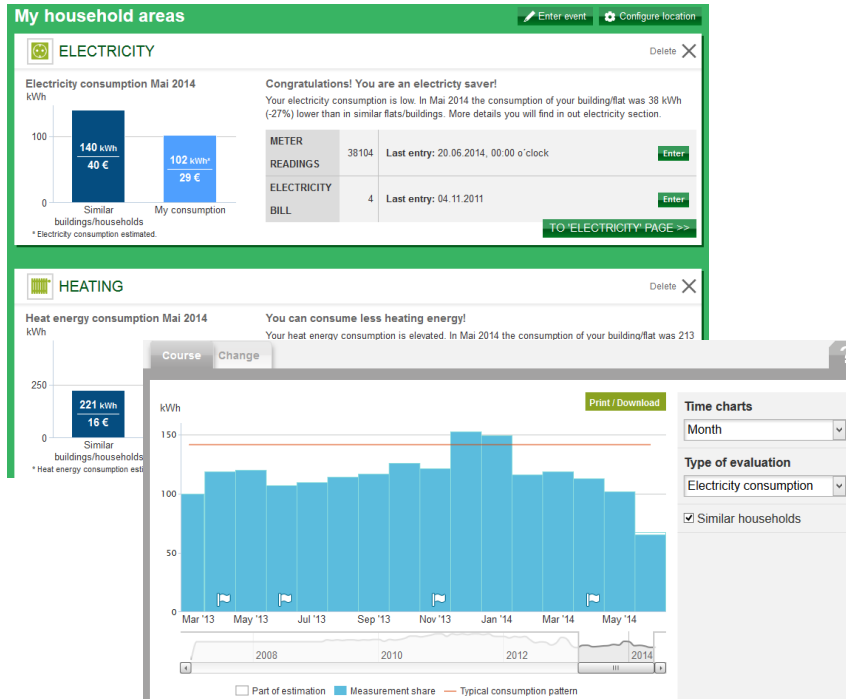

Online Energy Advise for 1 million households per year

iESA: 80,000 interactive Energy Savings Accounts

SEnerCon's FINESCE Team

What is iESA?

Interactive Energy Savings Account

Monitor for residential energy consumption since 2006

- Monitor, display, analyse and benchmark meter readings of households and buildings

80.000 registered users collect

- 1,000 manual meter readings per day
- Technical equipment and base data

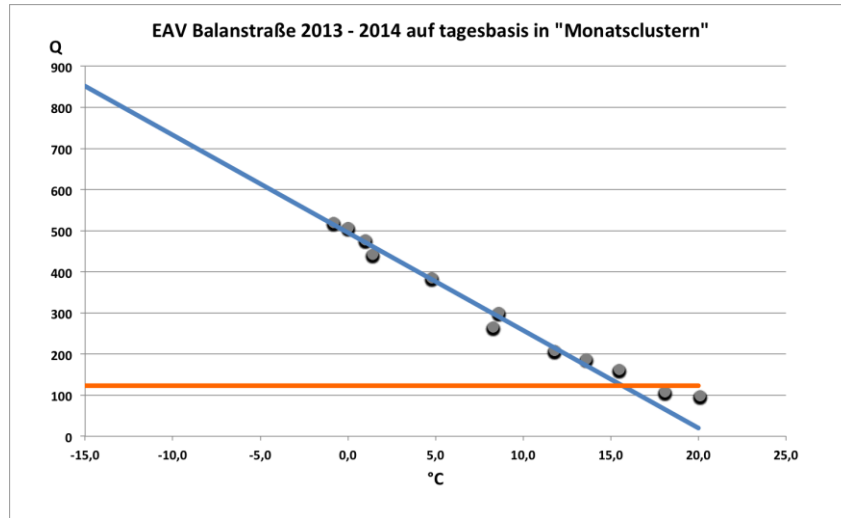

Logging and Evaluation of modernization events

- Univariate analysis: saving effects of green modernization

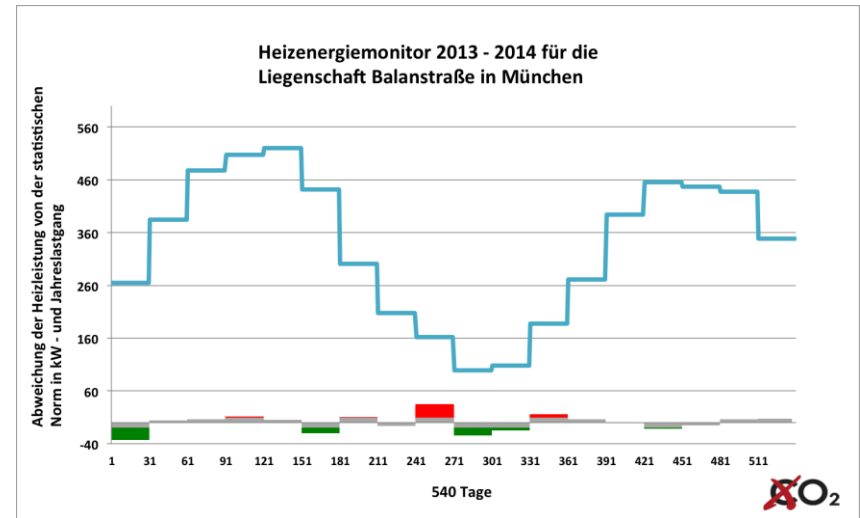

Actual version is translated into Danish and connected to FI-WARE and INSERO LIVE LAB

What we are building for FINESCE

heat monitor – technical view

heat monitor – user view
deviation from normal

A pleasure to meet you!

Yes, we are looking for new partners and projects!

Do you need monitoring and end user advise tools for residential buildings?

Let's meet and talk!

THANK YOU
